

On behalf of all of us here at:

THANK YOU FOR YOUR PURCHASE!

Dear Woodworkers,

We appreciate your interest in Multiple Layer inlay Stencils. We believe that we provide a simple way to create high quality inlays over and over, for an affordable price using our stencils. While we are confident in our stencils, we always value your feedback to help us create designs that you want to use so please let us know what you think in the contact us section. Also, on the contact us page be sure to send us a picture of your finished inlay along with a word or two about the piece, and we would love to show it off on our site for everyone to see. For any additional questions, or support please send us an email at: *TarterWoodworking@TarterWoodworking.com*

Like us on Facebook via the website homepage to get updates on special events, pricing, and new design releases!

Thanks Again,

Tarter Woodworking LLC

Additional Instructions: Hexagram

***FOR A DETAILED 10 MINUTE INSTRUCTIONAL VIDEO ON “HOW TO CREATE AN INLAY USING A MULTIPLE LAYER INLAY STENCIL”, PLEASE VISIT THE “HOW TO” SECTION OF THE WEBSITE: WWW.TARTERWOODWORKING.COM.

However this particular design does require some additional instructions besides the basics available in the above mentioned video...

1. The Hexagram is a rotate plate. Start by cutting your inlay pieces. Unlike most designs the cutouts are numbered, so work in numerical order on the cutouts. You need six pieces for each cutout. Complete this step with your collar removed from the inlay kit. If you have grain in your inlay wood cut so it matches later. Number them so you can match them up later.
2. Inlay pieces will fit better if in the same orientation with the router when cutting the pocket as the inlay piece. To make this easier mount your work on a board you can rotate, this way it's easier to cut your inlay pieces with the grain running through the design to highlight the over under pattern.
3. Set your positioning kit in the normal 45 degree angle. Cut all pockets for cutout #1 with the flat side always aligning with the top plate and the collar on your inlay kit.

4. Glue your #1 inlay pieces in and let dry, weighting them down may be necessary. Sand flush and move on to the next layer.
5. Complete the same process with Cutout #2 to complete your inlay project.
