## THANK YOU FOR YOUR PURCHASE!

Dear Woodworkers,

We appreciate your interest in Multiple Layer inlay Stencils. We believe that we provide a simple way to create high quality inlays over and over, for an affordable price using our stencils. While we are confident in our stencils, we always value your feedback to help us create designs that you want to use so please let us know what you think in the contact us section. Also, on the contact us page be sure to send us a picture of your finished inlay along with a word or two about the piece, and we would love to show it off on our site for everyone to see. For any additional questions, or support please send us an email at: [TarterWoodworking@TarterWoodworking.com](mailto:TarterWoodworking@TarterWoodworking.com)

Subscribe to our newsletter to find out about new designs when they become available as well as exclusive subscriber discounts. Like us on Facebook via the website homepage to get updates on special events, pricing, and new design releases!

Thanks Again,

Tarter Woodworking LLC

### Instructions: **Texas Star**

\*\*\*FOR A DETAILED 10 MINUTE INSTRUCTIONAL VIDEO ON “HOW TO CREATE AN INLAY USING A MULTIPLE LAYER INLAY STENCIL”, PLEASE VISIT THE “HOW TO” SECTION OF THE WEBSITE:

[WWW.TARTERWOODWORKING.COM](http://WWW.TARTERWOODWORKING.COM). Here, you can also access detailed printable .pdf instructions for each M.L.I.S. design.

Additional Instructions:

1. The Texas star is a rotational design. This means that plate number 2-2 should be rotated so all five sides are flush on top to complete.
2. The points of the star can be done as a single color by simply following the general directions, to achieve the two tone look of the display you will need to do a glue up of two contrasting woods. It is recommended that you use ¼ in or thicker wood and re-saw to the desired thickness on a band saw or table saw.
3. When doing the 6” design, cutting the pocket for plate 1-2 you may have to use an oversized base plate on your router or use the four plates (included in your kit) witch fit inside the circle. Simply cut around the outside as normal then insert the plates two at a time working across the

pattern to remove the entire pocket. Do not apply tape inside the circle to avoid wood chips from sticking to it during the process, causing you inserts to not seat properly.

4. For best results we have found that when setting up your positioning plates to cut your pockets, it is better to create a square corner with a flat surface on top and side. If you try to create the octagon shape with them it is more difficult to set them accurately.
