## THANK YOU FOR YOUR PURCHASE!

Dear Woodworkers,

We appreciate your interest in Multiple Layer inlay Stencils. We believe that we provide a simple way to create high quality inlays over and over, for an affordable price using our stencils. While we are confident in our stencils, we always value your feedback to help us create designs that you want to use so please let us know what you think in the contact us section. Also, on the contact us page be sure to send us a picture of your finished inlay along with a word or two about the piece, and we would love to show it off on our site for everyone to see. For any additional questions, or support please send us an email at: [TarterWoodworking@TarterWoodworking.com](mailto:TarterWoodworking@TarterWoodworking.com)

Subscribe to our newsletter to find out about new designs when they become available as well as exclusive subscriber discounts. Like us on Facebook via the website homepage to get updates on special events, pricing, and new design releases!

Thanks Again,

Tarter Woodworking LLC

### Instructions: **Dragonfly**

\*\*\*FOR A DETAILED 10 MINUTE INSTRUCTIONAL VIDEO ON “HOW TO CREATE AN INLAY USING A MULTIPLE LAYER INLAY STENCIL”, PLEASE VISIT THE “HOW TO” SECTION OF THE WEBSITE:

[WWW.TARTERWOODWORKING.COM](http://WWW.TARTERWOODWORKING.COM). Here, you can also access detailed printable .pdf instructions for each M.L.I.S. design.

Additional Instructions:

1. Any piece smaller than 1” in diameter should be re-sawn or sanded from a thicker timber.
2. This design includes “Flip Plates”. While following the numerical order of the plates, take into account any plates that say “FLIP” and cutout a mirrored inlay piece of what is displayed on the front. You can align your pattern by using the engraving. When inlaying your pieces into the pocket cutouts we highly recommend the use of our fixed positioning plates or at least use some timber clamped or taped in a fixed position to maintain pattern consistency on the larger Dragonfly. The smaller designs can use a positioning plate along the top, but must be free to slide side to side when lining up the template for pocket cut out.
