

On behalf of all of us here at:

THANK YOU FOR YOUR PURCHASE!

Dear Woodworkers,

We appreciate your interest in Multiple Layer inlay Stencils. We believe that we provide a simple way to create high quality inlays over and over, for an affordable price using our stencils. While we are confident in our stencils, we always value your feedback to help us create designs that you want to use so please let us know what you think in the contact us section. Also, on the contact us page be sure to send us a picture of your finished inlay along with a word or two about the piece, and we would love to show it off on our site for everyone to see. For any additional questions, or support please send us an email at: *TarterWoodworking@TarterWoodworking.com*

Like us on Facebook via the website homepage to get updates on special events, pricing, and new design releases!

Thanks Again,

Tarter Woodworking LLC

Additional Instructions: CLOWN FISH

***FOR A DETAILED 10 MINUTE INSTRUCTIONAL VIDEO ON “HOW TO CREATE AN INLAY USING A MULTIPLE LAYER INLAY STENCIL”, PLEASE VISIT THE “HOW TO” SECTION OF THE WEBSITE: WWW.TARTERWOODWORKING.COM.

However this particular design does require some additional instructions besides the basics available in the above mentioned video...

1. All parts for this inlay need to be cut in thicker material and re-sawn out, because of their small size.
2. Clown Fish is an “Inlayed-Inlay”. This means that you begin your inlay process on a piece of wood that will be the body of the design. In the display it is Padouk, or the orange portion of the body.
3. For clarity, directions are to recreate with the same woods as the display. However you can use any type of wood that you like. The thing that makes every inlay special is finding the perfect color or wood grain to accentuate the design.

Step #1

Cut your inlay pieces. Be sure that the collar is removed from your 1/8 In. inlay kit.

Wenge'- All parts marked #1 and the eye marked #4 these parts are for the tips of the fins and the eye.

Maple-All parts marked #2 these parts are for the three vertical stripes across the body.

Padouk-All parts marked #4 and #5 except the eye and mouth. These parts are for the Side fin, and lower fins.

Rose Heart-The mouth marked #4.

All parts to be re-sawn to 3/16 thick.

Step#2

Set up your positioning plates on a piece of padouk using plate #3 to find the grain or color that you want for the body. Remove plate#3 and using all plates marked #1 Cut pockets 1/8 In. deep. Glue in your inlay pieces, let dry and sand flush. Be sure to install the collar on the inlay kit when cutting pockets.

Step#3

Cut pockets marked #2 1/8 In. deep. Glue in your inlay pieces. Let dry and sand flush.

Step#4

Using plate #3 Remove the inlay collar and set the cutting depth to 1/4 In. Be sure that the bit will not bottom out into the inly kit. Do not pocket cut this piece it is an inlay piece, so only cut the outside perimeter. Re-saw piece out 1/4 In. thick.

Step#5

Install the inlay collar. Setup positioning plates on your project piece, using plate #3 cut out a pocket slightly shallower than your inlay piece. Glue in inlay piece, Let dry and sand flush. For this step use sanding dust from the project wood not the inlay piece when filling cracks.

Step#6

Cut pockets marked #4. Glue in inlay pieces, let dry and sand flush.

Step#7

Cut pockets marked #5. Glue in inlay pieces, let dry and sand flush.
